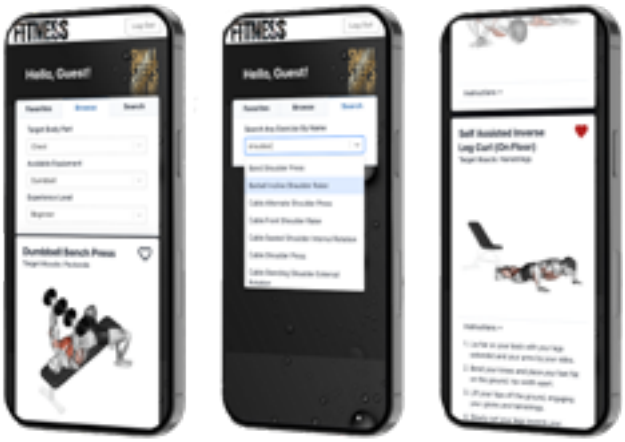
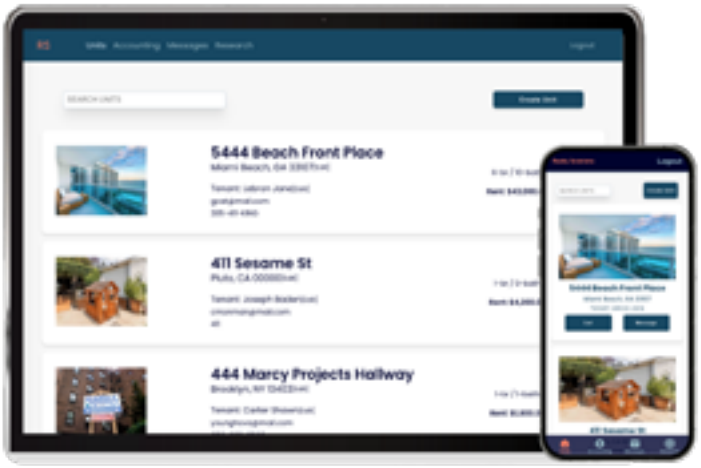
A few of my recent projects. Applications available at the link above with demos and full source code.

01 SIMPLER FITNESS

Fitness app that curates workouts tailored to you based on your experience level, your available equipment, and target body part. View detailed instructions, animated images, and save workouts for later. Built in Javascript using React and NodeJS. Workouts are re-treived from MongoDB and efficiently loaded with paginated results rendered with infinite scroll.





02 REALTY SOLUTIONS

For owners of rental properties to stay on top of finances and communicate with tenants. View mortgage information with the ability calculate profits/losses, view payments while adjusting APR, and get live mortgage payoff quotes. Features messaging funcionality for owner-tenant communication and ability to create and send rent receipts. Uses MERN stack, with authorization of seperate user roles using JSON web tokens with signed cookies, mongoose models, react router, and API integration from HUD.gov which pulls nationwide market rental rates.

03 BEAT BLACKJACK

Learn blackjack with hints and live feedback after each move, all while keeping track of your win rate and ROI. Adjust your bankroll, the number of decks used, bonus payouts, and even the number of splits allowed. Built with React and ChakraUI. Uses context API and reducer for global state management.

Software Developer

EDUCATION

BACHELORS IN COMPUTER SCIENCE

Florida International University

2020 - 2022 Miami, FL

ABOUT ME

I am a recent graduate and and web/mobile application developer, specializing in JavaScript, React, and NodeJs. As showcased in my projects, I aim to build efficient and scalable software that solve real-world problems. My goal is to utilize my education while acquiring knowledge from the experiences of seasoned engineers to provide valuable contributions to a forward-thinking team.

SKILLS

- JavaScript
- Python
- Java
- React
- NodeJS
- RESTful APIs
- 3rd party API integration
- MongoDB
- SQL
- Data Structures
- Software testing
- Software deployment
- DNS configurations
- Git version control

WORK EXPERIENCE

PROPERTY MANAGER/OWNER, SGS PPROERTIES

2014 - current Ft. Lauderdale, FL

- Managed all operations for 16 units including budgeting and tenant acquisition
- Secured financing and successfully closed on two separate duplexes over the tenure
- Utilized government assistance programs during the pandemic rental market shortage, effectively matching and providing low-income families with housing
- Converted business to 100% digital by upgrading paper lease system to secure digital encrypted leases
- Moved financial data to digital database which simplified money management and tax filing
- Created marketing strategies to acquire tenants including efficient advertising and search engine optimization
- Improved tenant relations by implementing effective communicatino strategies, leading to increased rates of lease renewals

CERTIFICATIONS

- Meta Front End Developer Professional Certification
- Back End Engineer CodeAcademy Certification
- MERN Stack Front to Back 2024 Edition
- Advanced JavaScript
- JavaScript Algorithms and Data Structures Masterclass
- The Complete Node.js Developer Course
